

TurfHub
SYNTHETIC GRASS SUPPLIER

HOW TO APPLY K9ZAP

- 1.)* The best time to clean your turf is in the evening because after the live enzymes from the bottle touch the surface, it needs the hose water to move around to destroy the bad bacterial spores which causes the bad odor. During the daytime, the sun will absorb the moisture quicker.
- 2.)* Pre-soak turf surface lightly with water hose prior to product application. (Doing this prevents burning of the live enzymes)
- 3.)* Agitate / Shake the 32 oz bottle of product to mix prior to application. This separates the enzymes from forming groups.
- 4.)* Insert water hose in max flow nozzle, ensuring black gasket is on the inside of the max flow nozzle.
- 5.)* Tighten bottle to nozzle clockwise by hand; do not over tighten. Turn water source on.
- 6.)* While holding the hose and nozzle end away from you, turn the safety tab back towards you.
- 7.)* Point the nozzle at the soiled areas and spray using a sweeping motion.
- 8.)* The nozzle dilutes the K9Zap concentrate product to 2 oz. / gallon, which covers 600 – 900 square feet.
- 9.)* When finished, turn the safety tab back to the upright position, turn water hose off at the source, and disconnect from max flow nozzle.
- 10.)* Turn the hose on without the nozzle.
- 11.)* Lightly spray the turf keeping the turf wet for as long as you can.
- 12.)* The longer the turf is wet the better for enzymes to move around and kill bad bacteria.
- 13.)* For first time application, use 6-8 oz per gallon / Or spray and let set for 10 minutes. Repeat 3 times (Do not let the turf fibers dry before repeating)
- 14.)* For routine maintenance, 2 oz per gallon (max flow nozzle is set for 2 oz per gallon of water)
- 15.)* Store in a dry area out of direct UV lighting. Between 40-120 degrees Fahrenheit.
- 16.)* Save the max flow nozzle and 32 oz bottle to use with 1 gallon refill. (Note: The max flow nozzle will not fit the gallon jug.)
- 17.)* Do not leave dispensing containers open and vented to the outside; always reseal with the supplied cap.
